LOOKING BACKWARD

at your attempts to locate a dealer in something you wanted to buy you will wonder why you did not make more use of the Classified Section of the Bell Telephone Directory.

More than fifteen hundred separate headings are used to classify the dealers in all sorts of things you need.

You will find it valuable as a ready reference guide to the merchants of the city.

ALAMEDA COUNTY CHIROPRACTORS' ASSOCIATION

(INCORPORATED)

See List of Chiropractors endorsed by the Association.

By referring to the above illustration you will see near the lower end a **magnified** illustration of a normal and an impinged nerve. Fig. 1 shows a nerve in perfect health, performing its function as nature intended. Fig. 2 shows a nerve impinged, and the flow of vital energy obstructed Fig. 3 shows vertebra out of alignment (subluxated)

EXPLANATORY

The brain is that wonderful organ which we intuitively recognize as the seat of all our power. We all understand that in some strange way, which has become so common to us as not to seem strange, that our sight, our hearing, our feeding and all of the other powers come from the brain. However, the question HOW this is accomplished rarely presents itself to us. Of course, we would all readily answer so far as the eye is concerned, by the optic nerve; but it presents a more difficult problem when we take the case, for instance, of a sensation in the stomach. In cases so remote from the brain, we immediately fall back upon the theory and to accusing the stomach of some wrong on its part, and do not assign the sensation in that locality to its true origin, because we have not been so educated. Yet we understand in an indefinite roundabout way, that every sensation in our entire body is an emanation from the brain. If this were not true, a wound would be painless.

When we begin to examine that wonderful extension of brain substance from the brain itself, called NERVE trunks, we find that they are composed of millions of small threads, called nerve filaments, and that they extend to every atom of the entire body and control every function of the body; that is to say, they control circulation, assimilation, seeing, hearing, smelling, tasting, feeling, heat and all the phenomena of the human organism.

It will be quite readily seen therefore that when these nerves are all in normal operation, every function of the entire body must be normal, and that any derangement of the nerves will equally derange the function which they, in normal condition, produce.

The brain covers itself by a number of bones which we call the skull, and the spinal cord is encased in a canal composed of twenty-four bones, named vertebrae. Between each pair of vertebrae is an opening through which a trunk nerve emanates. (See Cut.) When a vertebra of the spine, by any cause, is changed in its relation to another vertebra, the nerve that lies between will be pinched, and abnormal function, or "disease," is produced at the end of that nerve, or at the end of the filaments of that nerve.

DEFINITIONS

"Treat (Webster)—To care for medicinally or surgically, to manage in the use of appliances or remedies, as to treat disease, a wound or patient."

"Adjust (Webster)—To make exact fit; to fit; to make correspondent or conformable; to bring to proper relation."

THE CHIROPRACTIC WAY

A Chiropractor ADJUSTS the vertebrae into normal position, turns on the nerve supply, and nature restores the body to a state of health.

Because you have no pain in your back is no sign the vertebrae of your spine are in perfect order. If a nerve leading to your liver is pinched, where it emits from the spine, the "disease" will be in the liver and not in the back. This is true of all the organs and tissues of the body.

Chiropractic is purely a mechanical science and has nothing whatever to do with medicine or prescribing or treating or massage or manipulation of the muscles. When the vertebrae are put in place, and the impinged nerves released, the cause of "disease" or abnormal function is removed.

COMPLETE RELAXATION PERFECT EASE ABSOLUTE CONFIDENCE ASTONISHING RESULTS

906 FOURTEENTH STREET, CORNER MARKET

OFFICE HOURS 2 to 5 and 7 to 9 Evenings Daily Excepting Saturday Nights and Sundays

THE SPINAL CORD is a cable of nerves, beginning at the base of the brain and continuing down through the spinal canal. Thirty-one pairs of nerves branch from the spinal cord, emerging through the openings on each side of the spine. These nerves, with their branches are distributed to every part of the body. They are so numerous that a prick with the finest needle-point will cause pain. If the spinal cord is impinged and the impingement is great enough, it will cause paralysis of the body from that point downward. This proves conclusively that all motor power comes from the brain through the spinal cord; therefore if any of the nerves are impinged, it will interfere with the transmission of vitality to that portion of the body which is supplied by those nerves, the same as pressure on a hose leading to a flower garden would stop or partially stop the flow of water. We know the result—the flowers would wither and die from lack of nourishment. How foolish it would be to amputate the nozzle, or put on a drawing plaster to "draw" the water! That would be treating the effect. The first thing would be to find the pressure and remove that. So it is with the Chiropractor; he ADJUSTS THE CAUSE, and does not treat effects.

IF THERE IS anything wrong with your head, lungs, heart, stomach, liver, kidneys, or any other part of the body, you may be sure that it is a lack of life current going to those parts, due to a pressure on the nerves at the point where they exit from the spinal cord.

It is a scientific fact that 95 per cent of all inco-ordinations in the human body are caused by nerve pressure.

Constant practice makes perfect. An operator becomes skillful after years of practice.

Dr. W. H. Jordan is a graduate of several recognized Chiropractic Colleges and has a Certificate issued by the State Board of Medical Examiners, and has the endorsements of many of the best citizens of Oakland, who have become satisfied patients.

Chiropractic adjustments will remove the cause of disease.
Investigation will convince the most skeptical.

CHIROPRACTIC
HISTORICAL

The principle of **Chiropractic** adjustments was discovered in 1895 by **Dr. D. D. Palmer.** Chiropractic has since been developed into a well defined science by his son, **Dr. B. J. Palmer.**

Do you know what the word means? It is translated from the Greek words Kiro, meaning done by hand, and Pratik, meaning done skillfully, thus originating the word **Chiropractic.**

What is Chiropractic? It is a scientific method of locating and removing the cause of dis-ease without the use of drugs or instruments.

What is a Chiropractor? A person who uses the bare hands to adjust and uses no adjuncts whatever in the way of electricity, baths, hammers, mallets, etc.

What are the educational requirements of a Chiropractor? The **Palmer's School,** which is a three years residence course, is the **largest drugless school** in the United States, having a paid faculty of twelve members and over 800 students.

The **Palmer School** is correctly styled **"The Chiropractic Fountain Head."** The school was founded and chartered by the late **Dr. D. D. Palmer (discoverer of Chiropractic)** and was later transferred to his son, **Dr. B. J. Palmer, President of the college.**

Today the **World** gives more thought to **Prevention** than to the **Cause of Dis-ease.** One of the greatest modern discoveries is **Chiropractic,** which locates and removes the cause of **Dis-ease.**

You believe in Progress, then investigate Chiropractic. It costs you nothing for an analysis and it might be of great benefit to you.

Dr. Stiles would like to take this opportunity to thank his many patients for their courtesy and consideration during the past two years that he was in the military service and unable to have regular office hours.

I WANT DIFFICULT CASES
Eye-strain, headaches, dull, aching, itching, smarting, watering eyes, blurred vision, floating specks, apparently stupid children, incorrigible children, CROSS-EYES, insomnia, neurasthenia, irritability, depression, dizzy spells, impaired memory and other nervous derangements, THAT DO NOT YIELD TO OPTICIANS' OR OCULISTS' METHODS OF TREATMENT. If you have not been relieved of your symptoms, or your glasses do not give perfect satisfaction, call on me. I treat the eye as a part of the nervous system—not as mere organs of sight—and correct many nervous disturbances, by equalizing the distribution of nerve force.
I USE NO DRUGS OR DROPS TO EXAMINE THE EYES. By my method it is unnecessary to change your glasses every two to four years. Hours 10 a.m. to 4 p.m

Complete Relaxation——Perfect Ease——Absolute Confidence——Astonishing Results

906 FOURTEENTH STREET, CORNER MARKET

OFFICE HOURS 2 to 5 and 7 to 9 EVENINGS DAILY EXCEPTING SATURDAYS and SUNDAYS

THE SPINAL CORD is a cable of nerves, beginning at the base of the brain and continuing down through the spinal canal. Thirty-one pairs of nerves branch from the spinal cord emerging through the openings on each side of the spine. These nerves, with their branches, are distributed to every part of the body. They are so numerous that a prick with the finest needle-point will cause pain. If the spinal cord is impinged and the impingement is great enough, it will cause paralysis of the body from that point downward. This proves conclusively that all motor power comes from the brain through the spinal cord, therefore if any of the nerves are impinged, it will interfere with the transmission of vitality to that portion of the body which is supplied by those nerves, the same as pressure on a hose leading to a flower garden would stop or partially stop the flow of water. We know the result, the flowers would wither and die from lack of nourishment. How foolish it would be to amputate the nozzle, or put on a drawing plaster to "draw" the water. That would be treating the effect. The first thing would be to find the pressure and remove that. So it is with the Chiropractor, he ADJUSTS THE CAUSE and does not treat effects.

IF THERE IS anything wrong with your head, lungs, heart, stomach, liver, kidneys, or any other part of the body, you may be sure that it is a lack of life current going to those parts, due to a pressure on the nerves at the point where they exit from the spinal cord.

It is a scientific fact that 95% of all inco-ordinations in the human body are caused by nerve pressure.

Constant practice makes perfect. An operator becomes skillful after years of practice.

Dr. W. H. Jordan is a graduate of several recognized Chiropractic Colleges and has a Certificate issued by the State Board of Medical Examiners, and has the endorsements of many of the best citizens of Oakland, who have become satisfied patients.

Chiropractic adjustments will remove the cause of disease.
Investigation will convince the most skeptical.
Consultation Free.

did not come today so I called him by Long Distance Telephone as the matter was so important. I found out immediately just what I wanted to know and the entire conversation only cost forty cents. I intend to use my telephone more in future as many times it does not pay to wait for a reply by mail."

IF

a prospective customer, in consulting the Classified Section of the Bell Telephone Directory, found your display ad or your name prominently listed and decided to make his purchase from you, would you not think your ad worth while?

This is what happens many times daily when this Section of the Directory is referred to by prospective purchasers to find out who sells what they want to buy.

Think it over.
